

Greta Gaisumov

Frontend Developer

079787507 ggaisumov@gmail.com Chisinau, Moldova

Summary

I have a background in medicine and transitioned into frontend development out of passion for technology and problem-solving. I've built several personal projects using JavaScript, HTML, and CSS, and participated in a real-world project that generated revenue. I also worked as a data team supervisor, where I developed attention to detail, team coordination, and data accuracy. I'm a fast learner, self-motivated, and truly enjoy creating user-friendly, visually clear web interfaces. I believe my mix of analytical thinking, structure, and creativity makes me a great fit for this role.

Experience

Frontend Developer May 2025 - Present
Self-employed

- Developed a small web project "Legis" using JavaScript, HTML, and CSS based on Figma design files.
- Collaborated with a partner to implement features and improve functionality.
- Gained practical experience in building user-friendly interfaces.

Data entry specialist Oct 2022 - Nov 2024
NavTrac AI-Powered Yard Management System Chişinău, Moldova

Enter data about trucks, trailers, and other equipment coming in and out of the yard. Make sure the data in the NavTrac system is correct and complete. Check information like vehicle identification numbers (VINs), license plates, and cargo descriptions. Watch the NavTrac system to find mistakes or problems with the data and fix them. Help my team so everyone puts data in the right way. Check the NavTrac system often and give ideas to make it work better (IT)

General Nurse Sep 2020 - Feb 2021
IMSP Institutul Oncologic din Moldova Chisinau, Moldova

Checked and watched the physical and mental condition of patients. Helped with side effects of treatments, offered emotional support to patients dealing with difficult symptoms, helping them cope with their treatment journey. Worked with doctors, social workers, and physical therapists to make sure patients get complete care. Wrote down all patient care activities in electronic medical records, including patient assessments, treatments given, and patient responses to treatments.
